TIGER BAUANLEITUNG!

SEITE 1

Tiger gehören zu den Katzen, aber sie werden um einiges größer, als eine normale Hauskatzen. Die Tigermännchen können eine Schulterhöhe von knapp einem Meter erreichen und dreieinhalb Meter lang werden! Die Weibchen sind etwas kleiner als die Männchen, aber immer noch groß!

Bau dir selbst einen Tiger mit dieser Bauanleitung und den Teilen aus deiner LEGO Sammlung. Du kannst ihn wie hier in den typischen Tigerfarben bauen oder einen exotischen Tiger in anderen Farben bauen. Das ist dir überlassen!
